★★★★★ **Good power and performance.**

Reviewed in the United States on April 8, 2025

Color: D2830 1000KV | **Verified Purchase**

I installed these motors in a Great Planes G-44 Widgeon instead of the 3S recommended motors with 40amp speed controls and a 3000mah 4S battery and the plane really performs well. I used to have one of these planes a while back and flew it with the recommended 3S set up and it was kind of a dog. I really love the plane now.
